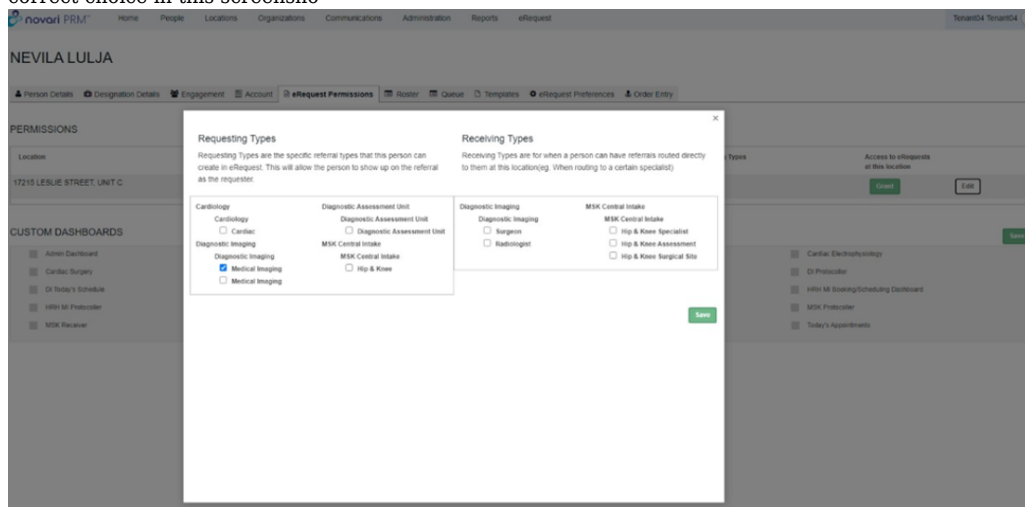

Mapping a provider from eRequest to ATC

eRequest Steps (done by eRequest admin)

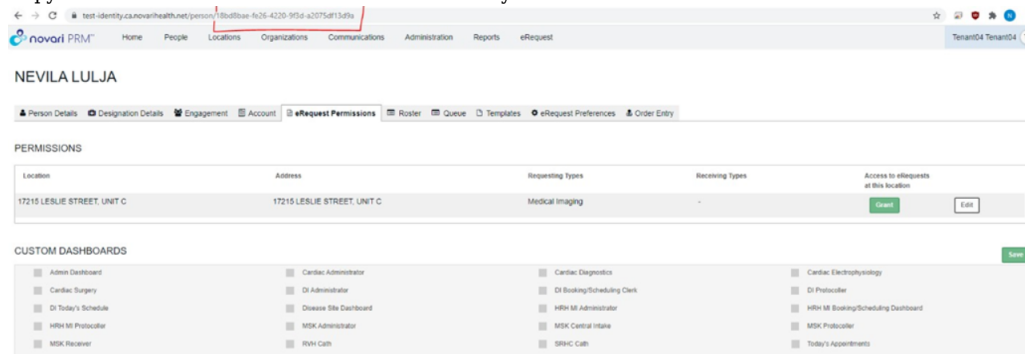

- Make sure the provider is setup with the correct receiving types. eg. Hip & Knee Specialist would be the correct choice in this screensho

- Under the location, click the ATC tab and enable ATC

- Copy the Person Id from the URL and save this so you can enter it into ATC

In order for Physicians to show in the send to ATC outside of the appointment component, the physician person record needs to be associated to the hospital location with receiving type for the hospital selected under permissions.

Location	Address	Requesting Types	Receiving Types	Service Types	Access to offsite patients at this location
Dr Stephens Office	25 Cumberland Street	Endoscopy Medical Imaging	Endoscopy Consult	-	<div>Yes</div> <div>Green</div>
Cornwall Community Hospital		Endoscopy Medical Imaging	Endoscopy Hospital	-	<div>Yes</div> <div>Green</div>
