Navigation Pane

Rachel Carmickle - 2024-05-16 - Identity Management V2 (NEW)

If you have permission to manage people and locations, those items are displayed in the navigation pane; otherwise, it only displays User profile.

The navigation pane can be collapsed or expanded by selecting the chevron. Your preference is retained for the next time you sign in.

When the navigation pane is collapsed, hover your mouse pointer over the icon to see the item's name.
